Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

This application claims priority to U.S. Provisional Application # 60/460,322, filed on 4/4/2003. Applicant's priority is acknowledged.

Specie Election

This application contains claims directed to the following patentably distinct species of the claimed invention:

1. A compound selected from the sub-genus of a polyhydroxy-aldonic acid, a polyhydroxy-aldonic lactone, a polyhydroxy-alduronic acid, a polyhydroxy-alduronic lactone, a polyhydroxy-aldaric acid, and a polyhydroxy-aldaric lactone.
2. An organic acid lactone.
3. A topical agent.
4. A dermatological disorder.

The species are independent or distinct because they encompass various compounds, organic acid lactones, topical agents and dermatological disorders. For example, the compounds and organic acid lactones listed all have different structures lending to different pharmacological action of each one, the topical agents all have different modes of action, and dermatological disorders are each comprised of different symptoms. Further, each recited species acquire a separate status, because they can be classified in different classification. Different classification of species is *prima facie* evidence of undue burden of search.

Applicant's election should identify 1) a compound selected from the sub-genus polyhydroxy-alldonic acid, polyhydroxy-alldonic lactone, a polyhydroxy-allduronic acid, a polyhydroxy-allduronic lactone, a polyhydroxy-alldaric acid, polyhydroxy-alldaric lactone, 2) an organic acid lactone, 3) a topical agent and 4) a dermatological disorder.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-34 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
